

Fire Safety in the Rail Sector

Protecting Your World

With millions of passengers using your services every day fire safety is of paramount importance. Chubb is one of the UK's best known providers of fire safety and security solutions for businesses and organisations nationwide. For over 200 years, our mission has been to make your world a safer place by protecting our customers with essential systems, equipment and services. With the increasing demands placed on your business, **Chubb is a partner you can trust.**

Our capabilities

With a long history working with the rail sector, especially since privatisation in 1994, Chubb understands the challenges you are facing and provides a full range of fire safety solutions to ensure railway companies comply with latest legislation and best practice associated with both the Fire and Rail industries.

Audited supplier to the rail industry for product and service supply

Chubb is one of the UK's leading fire safety specialists and an approved supplier of fire products and services to the rail industry through the Railway Industry Supplier Qualification Scheme (RISQS).

For new build vehicles, Chubb manufactures fire extinguishers and brackets; tested and approved to rail standards for all rail applications. Chubb's rail vehicle extinguisher expertise has been most recently shared with new-build train manufacturers.

We also have capability to provide equipment where legacy extinguisher models, brackets and retention straps are no longer delivering compliant crashworthiness performance.

Chubb has worked with a number of Train Operating Companies (TOCs) and Freight Operating Companies (FOCs) to recommend best practice for refurbishing rail carriages and locomotives.

Portable fire extinguishers maintenance

Chubb has a nationwide team dedicated to work for our rail customers. Our engineers can service virtually every type of fire extinguisher and we have capability to provide equipment where legacy extinguisher models are no longer supported, so that your customers, staff and rolling stock are protected.

All our engineers have been trained and assessed as competent through Sentinel, providing workers with a passport to work in trackside, depot and yard environments using the latest smart card technology.

Chubb's status as Primary Sponsor for specialist-employees assures rail industry providers that our workers' competence and fitness to work has been recognised and can be verified by rail industry partners.

Areas we protect:

- Stations
- Freight yards
- Rolling stock
- Offices
- Maintenance depots
- Stabling points

Fire Risk Assessment and Fire Consultancy

Chubb can provide a range of comprehensive Fire Risk Assessment services and work closely with you on a consultancy basis for specific projects to look at reducing or removing the risk of fire.

Fire alarm maintenance and monitoring

Chubb's fire service and maintenance contracts are a cost-effective way of managing your maintenance visits on your fire alarm and emergency lighting systems, whilst giving you peace of mind that your equipment will work when it is needed most – in the event of a fire.

Fire Training

The ability to act quickly and evacuate people safely and efficiently in the event of a fire is of vital importance.

Chubb offer bespoke fire safety training for the railway sector including: Fire Precautions Manager; Refresher and; Fire Evacuation Warden courses. These can be tailored to suit your requirements as well as Network Rail regulation.

Fire alarm monitoring by Chubb's dedicated network of Alarm Receiving Centre's ensure a rapid response to any alarm activation.

Mechanical firefighting systems maintenance

Chubb can provide service and maintenance for the following:

- Fire hydrants
- Gaseous fixed fire suppression systems
- Water based fixed fire suppression systems

Why choose Chubb?

- Decades of experience working in the rail industry
- RISQS audited member
- Sentinel Primary Sponsor
- First time fix avoiding unnecessary delays to your rail service
