

Temperature monitoring station

April 2020

A mobile monitoring station with the capability to detect body temperature and can be integrated into existing security systems. Easily re-deployed by on-site staff and ideal for monitoring body temperatures at entrances of buildings. The system comprises of a camera, an NVR, tripod and all the necessary brackets for installation. The tent comes with 4 coach bolts for fixing to concrete for permanent positioning. The electronic components of the temperature monitoring station require no network integration to existing on-site networks or systems.

BENEFITS:

- High sensitivity thermal module
- High quality 21" 1080p display screen
- Thermal image processing technology
- Support fever screening

- High sensitivity with real-time results
- Detect early warning signs of infection
- Mobile for additional random testing
- Leading thermal image processing technology

THE KIT:

- 1x Thermo graphic body temperature camera
- 1x Thermo graphic body temperature camera tripod
- 1x Thermo graphic body temperature camera tripod adaptor
- 1x Network video recorder (NVR) for image and data storage and retrieval
- 2x Hand held body temperature measurement cameras
- 1x Heavy duty tent (3m x 4.5m x 2.5m) with coach bolts for permanent fixing and 4x 13 kg cast iron weights
- High sensitivity thermal module
- NETD is less than 40 mk (@25°C)

Heavy duty tent

THE OFFER:

Includes: 1x engineer site visit to set up and commission (monitoring station and systems)
All connectivity cables, tent assembly, system calibration and commissioning
12 month warranty
Offer valid until May 2020

Excludes: Service and maintenance visits – Available on request

Call us today on 0844 561 1316 (option 1, option 1) or visit www.chubbsystems.co.uk

Temperature monitoring camera and tripod system

April 2020

A mobile monitoring system with the capability to detect body temperature. Ideal for monitoring body temperatures at entrances of buildings. Easily re-deployed by on-site staff, the system comprises of a camera, an NVR and tripod and all the necessary brackets for installation and includes ID badge integration. The electronic components of the temperature monitoring station require no network integration to existing on-site networks or systems.

BENEFITS:

- High sensitivity thermal module
- High quality 21" 1080p display screen
- Thermal image processing technology
- Support fever screening
- High sensitivity with real-time results

- High sensitivity with real-time results
- Detect early warning signs of infection
- Mobile for additional random testing
- Leading thermal image processing technology
- ID Badge integration option

THE KIT:

- 1x Thermo graphic body temperature camera
- 1x Thermo graphic body temperature camera tripod
- 1x Thermo graphic body temperature camera tripod adaptor
- 1x Network video recorder (NVR) for image and data storage and retrieval
- 2x Hand held body temperature measurement cameras
- High sensitivity thermal module
- NETD is less than 40 mk (@25°C)
- Visitor Express ID Badge integration option

Temperature hand-held monitoring camera

April 2020

A hand-held monitoring camera with the capability to detect body temperature. Ideal for monitoring body temperatures at entrances of buildings, universal use and easily deployed by on-site staff.

BENEFITS:

- High sensitivity thermal module
- High quality 21" 1080p display screen
- Thermal image processing technology

- High sensitivity with real-time results
- Detect early warning signs of infection

THE KIT:

- 1x Thermo graphic body temperature camera
- 1x Network video recorder (NVR) for image and data storage and retrieval
- High sensitivity thermal module
