Section 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier
Trade name: Adex-K

1.2 Relevant identified uses of the substance or mixture and uses advised against
Relevant identified uses: firefighting powder for use on class A, B, and C fires.
Uses advised against: not determined.

1.3 Details of the supplier of the safety data sheet
Manufacturer: UTC CCS Manufacturing Polska Sp. z o.o.
Address: ul. Kolejowa 24, 39 - 100 Ropczyce, Polska
E-mail address for a competent person responsible for sds: msds-rop@fs.utc.com

1.4 Emergency telephone number
112

Section 2: Hazards identification

2.1 Classification of the substance or mixture
Product is not classified as hazardous for human health and life and for the environment.

2.2 Label elements
Hazard pictograms and signal words
None.
Hazard statements
None.
Precautionary statements
None.

2.3 Other hazards
Product does not contain ingredients, which meet criteria for PBT or vPvB in accordance with Annex XIII of REACH Regulation.

Section 3: Composition/information on ingredients

3.1 Substances
Not applicable.

3.2 Mixtures

Section 4: First aid measures

4.1 Description of first aid measures
Skin contact: take off contaminated clothes. Wash contaminated skin with water and soap and rinse thoroughly. Consult a doctor if disturbing symptoms occur.
Eye contact: protect non-irritated eye. Rinse contaminated eyes with water for at least a few minutes. Avoid strong stream of water – risk of damage of the cornea. Contact an ophthalmologist if disturbing symptoms occur.

Ingestion: do not induce vomiting. Contact a doctor if disturbing symptoms occur. Never give anything by mouth to an unconscious person.

Inhalation: remove the victim to fresh air. Keep warm and calm. Consult a doctor if disturbing symptoms occur.

4.2 Most important symptoms and effects, both acute and delayed

Skin contact: possible dryness and redness in case of prolonged or repeated contact.
Eye contact: possible redness, tearing, temporary blurred vision.
Inhalation: exposure to high concentrations of dusts may cause respiratory irritation.
Ingestion: possible abdominal pains, nausea, vomiting and diarhoea after ingestion of large amount of the product.

4.3 Indication of any immediate medical attention and special treatment needed

Physician makes a decision regarding further medical treatment after thoroughly examination of the injured. Symptomatic treatment.

Section 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: none, product is used for fire extinguishing.

Unsuitable extinguishing media: none, product is used for fire extinguishing.

5.2 Special hazards arising from the substance or mixture

There are no special hazards arising from the mixture during fire – product is used for fire extinguishing.

5.3 Advice for firefighters

Personal protection typical in case of fire. Do not stay in the fire zone without self-contained breathing apparatus and protective clothing resistant to chemicals.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Limit the access for the outsiders into the breakdown area, until the suitable cleaning operations are completed. Ensure that effects of the breakdown are removed only by qualified personnel. In case of large spills, isolate the exposed area. Avoid direct contact with skin and eyes. Ensure adequate ventilation. Wear personal protective equipment. Do not inhale dusts of the product.

6.2 Environmental precautions

Do not let the product to enter ground waters, drainage system, sewage and soil. Notify relevant emergency services.

6.3 Methods and material for containment and cleaning up

Collect spilled product mechanically, avoid dusting (eg. using industrial vacuum cleaner with HEPA filter) and place it in properly labelled containers. Treat collected material as waste and pass it for disposal. Clean and ventilate contaminated place.

6.4 Reference to other sections

Section 7: Handling and storage

7.1 Precautions for safe handling
Handle in accordance with good occupational hygiene and safety practices. Do not eat, drink or smoke in the workplace. Before breaks and after work wash hands. Ensure adequate ventilation. Avoid eyes and skin contamination. Avoid dust formation. Do not inhale dusts of the product.

7.2 Conditions for safe storage, including any incompatibilities
Store in dry, cool and well ventilated place in original containers. Keep away from food, foodstuffs, animal feed and drinking water. Protect from direct sunlight. Keep away from incompatible materials (see subsection 10.5).

7.3 Specific end use(s)
No information about uses other than mentioned in subsection 1.2.

Section 8: Exposure controls/personal protection

8.1 Control parameters
There are no occupational exposure limit values at working place for the substances present in the mixture at the Community level. Please check any national occupational exposure limit values in your country.

8.2 Exposure controls
Observe good occupational hygiene and safety practices. Do not eat, drink or smoke when using the product. Wash hands thoroughly before breaks and after work. Avoid eyes and skin contamination. Ensure adequate general and/or local ventilation in the workplace.

Hand and body protection
Under normal conditions of work is not required. When prolonged contact is possible (eg. during operations connected with removal of spilled product) protective gloves should be worn. Recommended gloves material: nitrile rubber or other material providing sufficient level of protection.

When using protective gloves during work with chemical products, it should be noted that the efficacy levels and corresponding breakthrough times do not indicate actual times of protection at a particular workplace, because the protection can be affected by many factors, e.g. temperature, other substances etc. If there are any signs of degradation, damage or change in appearance (colour, flexibility, shape), it is recommended to replace the gloves with a new pair. Please follow the manufacturer's instructions, not only in terms of gloves' usage, but also in terms of their cleaning, maintenance and storage. It is also important to know how to take off the gloves in order to avoid hands contamination.

Eye protection
Use tightly fitting protective goggles if risk assessment indicates that it is necessary.

Respiratory protection
Under normal conditions of use is not required.

Personal protective equipment must meet requirements of directive 89/686/CE. Employer is obliged to ensure equipment adequate to activities carried out, with quality demands, cleaning and maintenance.

Environmental exposure controls
Avoid release to the environment, do not enter the sewage system. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Section 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

SAFETY DATA SHEET

pH: 4.5 (5% water solution)
melting point/freezing point: not determined
initial boiling point and boiling range: not determined
flash point: not applicable
evaporation rate: not determined
flammability (solid, gas): product is not flammable
upper/lower flammability or explosive limits: not applicable
vapour pressure: not applicable
vapour density: not applicable
density: 0.80-0.94 g/cm³
solubility(ies): soluble in water
partition coefficient: n-octanol/water: not determined
auto-ignition temperature: not applicable, product is not self igniting
decomposition temperature: 190°C
explosive properties: not display
oxidising properties: not display
viscosity: not applicable

9.2 Other information
No additional test results.

Section 10: Stability and reactivity

10.1 Reactivity
Product is feebly reactive. It does not undergo hazardous polymerization. See also subsections 10.3 and 10.5

10.2 Chemical stability
The product is stable under normal conditions of handling and storage.

10.3 Possibility of hazardous reactions
Hazardous reactions are not known.

10.4 Conditions to avoid
Avoid elevated temperatures, sources of fire and heat.

10.5 Incompatible materials
Strong oxidizers, strong bases, strong acids, alkali metals, magnesium.

10.6 Hazardous decomposition products
Not known.

Section 11: Toxicological information

11.1 Information on toxicological effects
Acute toxicity
Based on available data, the classification criteria are not met.
Skin corrosion/irritation
Based on available data, the classification criteria are not met.
Serious eye damage/irritation
Based on available data, the classification criteria are not met.
Respiratory or skin sensitization
Based on available data, the classification criteria are not met.
Germ cell mutagenicity
Based on available data, the classification criteria are not met. Analysis of product composition does not indicate presence of components which can cause mutagenic effect.
**Carcinogenicity**
Based on available data, the classification criteria are not met. Product does not contain components which are carcinogenic.

**Reproductive toxicity**
Based on available data, the classification criteria are not met.

**STOT-single exposure**
Based on available data, the classification criteria are not met.

**STOT-repeated exposure**
Based on available data, the classification criteria are not met.

**Aspiration hazard**
Based on available data, the classification criteria are not met.

### Section 12: Ecological information

**12.1 Toxicity**
Product is not classified as hazardous for the environment.

**12.2 Persistence and degradability**
Product is mostly a mixture of inorganic substances which do not undergo biodegradation.

**12.3 Bioaccumulative potential**
No data.

**12.4 Mobility in soil**
Mobility of components of the mixture depends on the hydrophilic and hydrophobic properties and biotic and abiotic conditions of soil, including its structure, climatic conditions, seasons and soil organisms.

**12.5 Results of PBT and vPvB assessment**
Substances contained in the product are not assessed as PBT or vPvB.

**12.6 Other adverse effects**
Product is not classified as hazardous to the ozone layer. Consider other harmful effects of individual components of the mixture on the environment (eg, endocrine disrupting potential, global warming potential).

### Section 13: Disposal considerations

**13.1 Waste treatment methods**
Disposal methods for the mixture: do not deposit with household waste. Do not let product to enter sewage system. Disposal in accordance with the local legislation. Waste code should be assigned in place of formation.
Disposal methods for used packing: package should be passed to a certified company. Do not mix with other wastes. Waste code should be assigned in place of formation.

### Section 14: Transport information

**14.1 UN Number**
Not applicable, product is not classified as dangerous during transport.

**14.2 UN proper shipping name**
Not applicable.

**14.3 Transport hazard class(es)**
Not applicable.

**14.4 Packing group**
Not applicable.
14.5 Environmental hazards
Not applicable.

14.6 Special precautions for user
Not applicable.

14.7 Transport in bulk according to Annex II of MARPOL and the IBC Code
Not applicable.

Section 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

15.2 Chemical safety assessment
It is not necessary to carry out a chemical safety assessment for the mixture.

Section 16: Other information

Abbreviations and acronyms
PBT Persistent, Bioaccumulative and Toxic substance
vPvB very Persistent, very Bioaccumulative substance

Trainings
Before commencing working with the product, the user should learn the Health & Safety regulations, regarding handling chemicals, and in particular, undergo a proper workplace training.

Key literature references and sources of data
This SDS was prepared on the basis of sheets of the individual components, literature data, online databases as well as our knowledge and experience, taking into account current legislation.

Additional information
Classification was based on data on hazardous substances calculation method under the guidance of Regulation 1272/2008/EC (CLP).

Date of issue: 15.04.2016
Version: 1.0/EN
Composed by: mgr Paweł Jędzejczyk (on the basis of producer’s data)
Safety Data Sheet made by: “THETA” Technical Consulting

The information above is based on a current available data concerning the product, but also on the experience and knowledge in this field of the producer. They are neither a quality description of the product nor a guarantee of particular features. They are to be treated as aid to safety in transport, storage and usage of the product. That does not free the user from the responsibility of improper usage of the information above and also of improper compliance with the law norms in the field.
